PROFESSIONAL SUMMARY

Software Developer and Game Developer with 14+ years of professional experience, including 5+ years of experience in the IT profession. Experienced in Android, Flutter, Unity, mobile game development, application architecture, Firebase, local databases, and production deployment. Combines hands-on software engineering experience with a strong background in technical education, problem-solving, and mentoring.

CORE TECHNICAL SKILLS

Languages	Java, Kotlin, C#, Dart, C, Python (Basics)
Mobile & Game	Android, Android Studio, Flutter, Unity, 2D/3D Game Logic, Multiplayer Systems
Backend & Data	Firebase, Firestore, REST APIs, SQLite, Drift
Architecture	MVVM, Clean Architecture, Repository Pattern
Engineering	UI/UX, Animations, Performance Optimization, Debugging, Play Store Deployment
Tools	Git, Firebase Analytics, Remote Config, Push Notifications

PROFESSIONAL EXPERIENCE

Senior Android / Game Developer

Artoon Games

Surat | June 2022 – Present

- Develop and maintain live multiplayer and offline card games for Android, with a focus on stable gameplay and production reliability.
- Implement game logic, matchmaking and real-time gameplay features across multiple shipped titles.
- Optimize application and gameplay performance, troubleshoot crashes, and improve overall user experience.
- Collaborate with designers, backend teams and other developers to deliver polished gameplay experiences.

Key Projects

- Tonk – Multiplayer (US Release)
- Spades / Bid Whist
- Mindi
- Indian Rummy
- Callbreak Multiplayer

Android Developer

Beetonz Infotech

April 2021 – May 2022

- Developed multiple Android applications using Java and Android Studio.
- Worked across UI development, API integration, debugging and performance tuning.
- Built utility applications involving sensors, media handling and file-system operations.

SELECTED PERSONAL & FREELANCE PROJECTS

Puzzle Games – 4-in-1 Casual Game App

Android · Java · Game Development · UI/UX

play.google.com/store/apps/details?id=com.xplorea.memorygame

- Designed and developed a multi-game application combining Sudoku, Minesweeper, Marble Solitaire and 2048.
- Built themed game experiences with polished UI, animations, multiple modes and Play Store deployment.

Road Furnituring Management System (RFMS)

Flutter · Dart · Riverpod · Drift/SQLite · Firestore

- Built a real-world business management solution spanning Windows desktop and Android.
- Implemented inventory tracking, package/site management, reporting, quotation and invoice workflows.
- Integrated a local database with cloud synchronization for reliable offline-first workflows.

EARLIER CAREER EXPERIENCE

Lecturer – Diploma Engineering College

5+ years

Technical education, programming fundamentals and student mentoring.

Lab In-Charge – Atal Tinkering Lab

2 years

Hands-on technical education, embedded systems and practical engineering activities.

EDUCATION

Bachelor of Engineering (Electronics & Communication) — Government Engineering College, Bhavnagar (GTU)
